## FUNKTIONER

**BEVEL TAPER** | The unique Bevel Taper is designed to be stiffer through the taper which provides unrivaled control, and accuracy. The stiff taper zone allows the stick to load higher in the shaft which creates more leverage and increased velocity on shots.

**MINIMUS CARBON 25** | This carbon weave is a flat, spread-tow material that optimizes strength by reducing fiber crimp and deformation in the composite layering. The custom weave is thin and light, yet extremely strong and resistant to damage.

**R.L.C. 188** | A completely re-engineered construction that provides improved durability and weight reduction by using lower weight fibers and thermoplastic-toughened epoxy resin that creates the consistent level of balance, weight, and durability that the most elite players in the world expect from a stick.

**O.G. SHAFT SHAPE** | Flat side walls with rounded corners provides consistent feel and control for stickhandling, shooting, and passing.

**FUELCORE ULTRA** | The polymer blade core reinforced with our proprietary rib design is tough and durable and is wrapped with highgrade carbon fiber and our Minimus Carbon 25 outer weave which creates the most responsive blade in our lineup.

## FUNKTIONEN

**EDGE TAPER** | The angular edge taper drives flex energy through the hosel that magnifies power and quick release. Our unique geometry improves response and is more stable and plays stronger.

**EDGE BLADE** | The next generation in stick technology. Featuring a unique shape where the blade meets the ice, the Edge blade design engages the stick like never before making it even easier to load for quick release on shots. Our lightweight polymer blade core wrapped with Minumus Carbon 25 enhances puck feel and reduces blade fatigue.

**MINIMUS CARBON 25** | A flat spread-tow material that optimizes strength by reducing fiber crimp and deformation in the composite layering. The custom weave is thin and light, yet extremely strong and resistant to damage.

**PL188** | A completely reengineered construction that provides improved durability and weight reduction – using lower weight fibers and thermoplastic-toughened epoxy resin that creates the consistent level of balance, weight, and durability that our pro players expect.

**OG SHAFT SHAPE** | Flat side walls with rounded corners provides consistent feel and control for stickhandling, shooting, and passing.
